Whole of Vehicle Marking

Dear <<firstname>>

Government has announced its intention to implement mandatory Whole of Vehicle Marking (WOVM) for all passenger vehicles with 9 seats or less (excluding motorcycles) entering the NZ vehicle fleet.

The initiative is aimed at reducing vehicle theft and had been previously announced in January 2005.

It is expected this will be implemented sometime in 2008.

The initiative will require a number of changes to the entry process for new and used vehicles.

IMVDA will be making submissions to ensure there is minimal disruption to the present entry/compliance process.
