Hybrid Cars

- Toyota Prius, Honda Inspire, etc are becoming more popular.
- These cars have “High Voltage Systems”.
- **Warning:** you must exercise care and take safety precautions when handling these vehicles.
- The IMVDA has researched the safety requirements and can advise you.
- Components for these vehicles can be expensive! Battery packs and ECU’s can cost up to \$7,000-00.
- Be aware of the costs of your “Consumer Guarantees” obligations!
- Ask us to explain the issues.
- Phone us for more information.

IMVDA ~ working for you!
